DETAILED ACTION

1. In view of the request filed on May 21,2003, the prosecution is hereby reopened, and the finality of the office action mailed on 5/8/2003 is removed for the reasons set forth below:

Although the new grounds of rejection presented in the Final Office Action mailed on 5/8/2003 was prompted by an amendment to claim 1 (received on 2/20/2003), the new grounds of rejection were also applied to unamended claims 15-38, and therefore the office action mailed 5/8/2003 should have been NON-FINAL.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1,2,7-16,20-26,28,29,31-55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brotman et al (5917889) in view of Weber (6532444).

As per claims 1,14-16,24-26,33,35,36,40-43,48-51,54,55 <u>Brotman et al (5917889)</u> teaches a voice recognition accuracy (col. 2 lines 45-55) comprising:

Application/Control Number: 09/650,173

Art Unit: 2655

"prompting a user.....characters", "identifying a subset....characters", "generating a dynamic.....items" as prompting and creating a dynamic grammar (fig. 2, and col. 4 lines 46-67)

"prompting the user.....grammar" as voice prompt and recognition (Fig. 2, subblocks 640-730)

executing a search using the query, adding a query to the search, and developing a grammar from this search query (col. 5 lines 35-67);

Brotman et al (5917889) does not explicitly teach using a voice query to search a domain of items and a grammar specifying valid utterance for interpreting the voice query, however, Weber (6532444) teaches providing utterances to a speech processor that uses a grammar to determine matches (Fig. 3a). Therefore, it would have been obvious to one of ordinary skill in the art of query systems to modify the teachings of Brotman et al with speech recognition utterance capability and comparing to a grammar because it would make the system as taught by Brotman a more user interactive speech recognition system (Weber, col. 2 lines 53-65, solving the deficiencies listed in col. 2 lines 11-50).

As per claims 2,20,29,44,45 <u>Brotman et al (5917889)</u> teaches "prompting a user.....query term" as N character submission (col. 4 lines 36-41)

As per claims 7,21,22, and 32,46 <u>Brotman et al (5917889)</u> teaches user selected keypad entry (col. 4 lines 36-41)

Page 4

Application/Control Number: 09/650,173

Art Unit: 2655

As per claims 8,46,52, <u>Brotman et al (5917889)</u> teaches "user uttering the characters and using the keypad entries of the.....character" as using utterances to match (col. 4 lines 15-35).

As per claims 9,34,47, <u>Brotman et al (5917889)</u> teaches dynamic grammar usage (col. 4 lines 47-52)

As per claims 10,39,51,54, <u>Brotman et al (5917889)</u> teaches extracting text from a subset of items derived from a database (col. 5 lines 25-30)

As per claims 11,28,38, <u>Brotman et al (5917889)</u> teaches storage of the subset (col. 5 lines 18-24)

As per claims 12,31, <u>Brotman et al (5917889)</u> teaches a fixed number of input characters (col. 5 lines 25-30)

As per claims 13,23,37, <u>Brotman et al (5917889)</u> teaches determination of a threshold number of characters (col. 5 lines 25-30).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/650,173 Page 5

Art Unit: 2655

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 3-6,17-19,27, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of <u>Brotman et al (5917889)</u> in view of <u>Weber (6532444)</u> in further view of Weber (6434524).

As per claims 3-6,17-19, and 27, the combination of Brotman et al (5917889) in view of Weber (6532444) does not explicitly teach using subcategories labeled as "author", however, Weber et al teaches an object interactive user interface using speech recognition with subcategories of author (Weber, col. 6 lines 56-63). Therefore, it would have been obvious to one of ordinary skill in the art of speech signal processing to modify the teachings of Brotman et al (5917889) in view of Weber (6532444) with categorization of speech inputs, such as author, because it would advantageously allow the system to be adapted to a specific task, thereby limiting the amount of relevant data, and therefore speeding the search engine (col. 2 lines 45-55).

Response to Arguments

6. Applicant's arguments with respect to claims 1-38 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/650,173

Art Unit: 2655

Conclusion

7. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231
or faxed to:
(703) 872 9314,
(for informal or draft communications, please label "PROPOSED" or "DRAFT")
Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal
Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Opsasnick, telephone number (703)305-4089, who is available Tuesday-Thursday, 9AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Doris To, can be reached at (703)305-4827. The facsimile phone number for this group is (703)872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group 2600 receptionist whose telephone number is (703) 305-4750, the 2600 Customer Service telephone number is (703) 306-0377.
